The end!

Grown-ups: keep the learning going with **PastRush**, free on iPhone.

Watching birds

They watched how birds tilt their wings to turn, and tested kites and gliders to learn how to steer in the air.

Two brothers

Wilbur and Orville Wright ran a bicycle shop in Dayton, Ohio. They loved to build things.

Draw it!

A wind tunnel

They built their own wind tunnel to test more than 200 small wing shapes and find the best one.

Draw it!

Kitty Hawk

They went to Kitty Hawk, North Carolina, because it had strong, steady winds and soft sand for landings.

✂ cut here

Four flights

They flew four times that day. Wilbur's last flight lasted 59 seconds. Then they sent a telegram home to their father.

December 17, 1903

Orville flew for 12 seconds and 120 feet. It was the first powered airplane flight in history.
